

SPEEDSAFE

Cut protection gloves for professionals

SPEEDSAFE®

Master class cut protection

The advanced development of the Speedsafe cut protection gloves series is complete. The Black FL Speedsafe cut protection glove achieves the highest performance level category in EN 388-2016, EN ISO 13997, and the ANSI standard.

• Abrasion resistance	4	EN 388-2016	EN ISO 13997	EN 407
• Cut resistance	X			
• Tear resistance	4			
• Puncture resistance	4	4X44F		X1XXXX

The Speedsafe cut protection gloves are suitable for all work involving a high risk of being cut. Every work accident costs money. With our Speedsafe cut protection gloves, users are more willing to wear the gloves, and accidents are avoided.

- Optimal cut protection
- Extremely good grip
- Excellent tactile feel
- Ability to operate a touch screen
- Maximum wearing comfort
- Breathable fabric
- Excellent durability
- Washable
- Possible to check vital functions
- Unbeatable price-performance ratio

The ergonomic fit prevents hand fatigue when wearing the gloves for long periods of time.

10 reasons in favour of this glove!

All gloves are registered and the design is protected.

Safeline®

Your specialist for high visibility and maximum safety

Safeline Speedsafe cut protection

Sharp objects, broken glass: everyday life for fire and rescue services. Every time you are called out, there is always a risk of getting injured, even when you are paying close attention. However, those who injure themselves cannot help others or may only be able to offer limited help. Speedsafe gloves are highly cut-resistant gloves. Through the use of high-performance yarns in combination with new technology, we have succeeded in achieving level 5 cut protection, which is the highest possible cut protection level.

Speedsafe offers you protection in any job where there is a risk of cutting injuries. Speedsafe gloves protect effectively and successfully against cuts and offer a first-class fit, maximum wearing comfort, and an outstanding grip.

Speedsafe gloves can also be used by personnel providing technical support to the fire and rescue services. It is also possible to check a person's vital functions without any problems. Speedsafe gloves are breathable, washable, and enable extremely good dexterity. We offer the following types of gloves: Speedsafe with a short cuff with or without a coating as well as Speedsafe Black Long 5 with a 38 cm long cuff, nitrile foam.

Protective gloves

The police, fire fighters, and paramedics appreciate the advantages of the Speedsafe gloves every day in their work. In police operations, officers often have to search people, often it's like reaching into a grab bag - you never know what is going to be inside. With the Speedsafe gloves, officers are also protected from cuts, for example by razor blades. Even attacks with knives or broken bottles allow the officers to intervene when they are wearing our gloves. *This means more serious injuries can be prevented (information from officers who wear these gloves)*

Serious cutting injuries - with Speedsafe cut protection gloves, there's no chance of them

In the jungle of cut protection gloves, it is easy to select the right gloves from us. You don't need to make any compromises with Speedsafe gloves. Only a glove for maximum cut resistance, ultra light, super flexible, breathable, touch screen operation possible, perfect tactile feel, especially when searching, defence against knife attacks, puncture protection against everyday objects, impregnated against bacteria, washable, best possible comfort, no loose lashes on your wrist that could cause entanglement in rotating machines and therefore lead to serious injuries. Cost saving because we use our own high quality developments. Speedsafe gloves are registered with the DPMA.

Speedsafe Black L5

Speedsafe Black L5:
Coating: Latex
Colour: Black
Sizes: S-XXXL / glove sizes 7-12

SPEEDSAFE®

N5SP

The Speedsafe Black N5SP special-purpose glove protects against cuts and blows. This glove is not only used by police and military units, but also by a wide variety of other professions. Quality and appearance have been combined to create a first-class product. The criteria tipping the scale are the high wearing comfort and ergonomic fit in combination with breathability and a good tactile feel. Even with its high cut resistance and impact protection, this glove still allows you to operate weapons and touch screens (smart phone, tablets, etc.). This is a must and is essential for police and military personnel.

Speedsafe Black N5SP
